DETAILED ACTION

The amendments, and the request for consideration filed December 29, 2003 have been received and entered into the file.

Applicant's amendment distance the instant the claims herein from the prior art methods, and use. An exhaustive literature search failed to produce any reference to claimed compounds for the use herein claimed. Although some compounds claimed by applicant, reside in the prior art, the prior art use fails to state, or suggest the use herein claimed.

Particularly, the unexpected benefits residing in the claimed method convincingly distance the claimed method from the prior art. It would not be obvious for the skilled artisan to employ the claimed compounds concomitantly and expect the therapeutic effect herein illustrated. It is noted that the applicant has illustrated a representative sample of the claimed active ingredient group, thereby illustrating the unexpected results for such a grouping. The skilled artisan would not expect the claimed compounds to produce the illustrated pharmacological effect, claimed herein, in view of the enclosed showing.
